

CEU Plan is interested in teaming up with you to provide our students with an increase in training options, in order to meet their continuing education requirements.

Here are some facts about CEU Plan:

- CEU Plan has been approved in 49 states for many years, working with the State Regulatory Agencies and their Operator Certification Programs to provide continuing education for drinking water and wastewater treatment plant licensed operators. We report course completion rosters on a weekly, monthly, and quarterly basis and are prepared to meet any online upload requirement. Ask any state administrator about our accuracy and timely reporting.
- CEU Plan is accredited by IACET and meets the ANSI/IACET Standards 1-2013 for continuing education training. In order to achieve the accreditation, CEU Plan completed a rigorous application process, including a review by an IACET site visitor, and successfully demonstrated adherence to the ANSI/IACET Standard addressing the design, development, administration, and evaluation of its programs.
- We started operations in 2000 and have become the largest online training provider for the water and wastewater treatment industry, with over 40 instructors (subject matter experts) representing over 1,750 years of combined experience. Our program includes over 250 highly relevant courses in three different formats: text base, text base with streaming, and streaming platforms. With over 135,000 courses taken online, our database includes over 175,000 licensee contact information files and records maintained for over 14 years.
- We have continued to grow every year and have constantly upgraded our program to meet student recommendations and to address technological developments. CEU Plan has undergone six system upgrades to include many inquiries from students, digital and image breakthrough, updates to the ANSI/IACET Standards, and custom development to provide a trouble-free, easy access, operator- friendly experience for the student.
- In conducting an engine search (such as Google) on CEU Plan, you will find our connection to various state regulatory agency websites, exhibited at the annual conferences: America Water Works Association, Association of Boards of Certification, Association of Safe Drinking Water Administrators, National Environmental Health Association, National Rural Water Association, and Water Environment Federation.
